 75c Waists for 50c
 White Lawn Waists, with tucked backs and embroidery fronts.

THE E. ALKEMEYER COMPANY.

of that country. They are best organized in the bookbinding, textile and tobacco trades.
 The truck drivers and teamsters of Albany, N. Y., recently organized, have formulated certain demands, which they will present to their employers on April 28. The men will demand an increase of wages, according to the following schedule: Average dollars a week of ten dollars, \$10 a week for single horses, ten hours to constitute a day's work, with double pay for overtime. The employers are understood to be bitterly opposed to granting the demands.
 The Carpenters' union of Tampa, Fla., inaugurated an eight-hour rule, and fully half of the contractors in the city refused to accede to the demands thus made. These several hundred men have been thrown out of employment. All of the labor unions in Tampa are backing the carpenters in the inauguration of the eight-hour system, and trouble of a considerable nature, it is said, will follow if the demands are not granted. The contractors declare that they will not grant them.
 All the knitters in the mills at Little Falls, N. Y., numbering several thousand, will go on strike because of differences in the wage question. The Knitters' Union recently asked knit goods manufacturers to increase their pay from \$1.25 to \$1.47 per day, two years ago the same demand was made by the manufacturers. The knitters were then unorganized, but today their union is a very strong one. The skilled mechanics in the mill are supporting the knitters.
 The utmost confidence prevails at strike headquarters at Olneyville, R. I., that the American Woolen company will be successful for the weavers. The leaders who are at work among the employees of the company's mills in other cities say that the weavers are being organized as never before. Those even in the independent mills are forming unions, the leaders say, while weavers in the American Woolen company who have organized have had their wages raised, or will get increases where they have been working for 10 and 20 per cent below the standard.
 The failure of the movement to stop production in the Washington mills, Lawrence, Mass., coupled with the reported grant increase in the number of looms in operation at Olneyville, R. I., and elsewhere brought out the statement from a leading mill official that the strike against the American Woolen company has been broken. The strike leaders look upon the disappointment caused by the Lawrence weavers with little concern. Secretary of the Textile Union, says that as there are 2500 weavers now out in Olneyville, Pittsfield, Blackstone, Pawtucket and Woburn, the strikers' position is still strong.
 The dispute between the Britannia metal-works of Sheffield, England, and the Master Silversmiths' association has come to a head. The men gave in their notices to three firms in the first instance. This step was met by the associated employers giving notice to all their society men. Nearly 250 workmen, or about two-thirds of the whole of the trade, are thus far under notice, and both sides appear determined to fight the matter out. The masters are making a guarantee fund to assist small employers to join in resisting the demands of the men for increased remuneration. The Master Silversmiths' association declares that higher wages, however, are not the real object in dispute, the great question being the freedom of employers to take apprentices, that freedom having been ex-

pressedly barred by the action of the union. New York leads all other cities in the United States in the matter of high wages for the skilled labor. At the top of the list are the plasterers' laborers, whose wages have risen year by year until they are \$3 a day for eight hours work, and who now demand \$2.50 a day. Second to them come the masons' laborers, who receive \$2.75 a day on an average. The present wages of the tile layers' helpers, a class of laborers some of whom develop into tile layers, are \$2.65 a day, but they have made a demand for \$3 a day, which they are prepared to enforce on June 15. Like all other unions in the building trades, its members work under the eight-hour rule and receive special rates when they work overtime. The city laborers generally, including the street cleaners, average \$2 a day, which is higher wages than are paid to a large class of workers in any other city, or perhaps in the world. While the plasterers' laborers think they are underpaid \$3 a day, there are many of highly skilled mechanics, the members of which work for lower wages. Among these are the cabinet makers and a number of other skilled mechanics in the woodworking trades. The wages of carpenters throughout New York average less than \$3.50 a week, and in some parts of Brooklyn they are less than \$3 a day. Up to five years ago the wages of skilled carpenters were less than \$3 a day, and they are now higher. Bookbinders, painters who can do graining or working in many cases for less than \$3 a day, and the skilled mechanics in a number of foundry trades do not earn so much as that.
 There was an interesting argument before the board of control in Toronto, Canada, recently, as to the employment of local labor on the iron work at the new manufacturing building in the city grounds. The Canada Foundry company is the lowest tenderer for the work, and the labor union want a string of the contract protecting local workmen. The contention of the laboring men was that they had supported the by-law for funds for new exhibition buildings on the understanding that they would get the work and that only local labor would be employed.
 Senator Patterson of Colorado has presented a memorial to the senate signed by over 300 American citizens residing in Hawaii praying the enactment of legislation completely excluding Chinese and Japanese from any American territory and providing that all labor of every description performed for the Federal government should be done only by citizens of the United States. The petitioners say that 75 per cent of the labor in Hawaii is performed by Orientals, to the exclusion of American labor, and they call attention to the fact that Chinese mechanics are doing the gear work of the 15000-ton population of the islands are from China and Japan.
 The supreme court of Porto Rico has released Santiago Telesforo, president of the Federation of Workmen of Porto Rico, sentenced December 12 last to three years, four months and eight days imprisonment on the charge of conspiring to raise the price of labor in Porto Rico. In presenting the appeal counsel for Telesforo dwelt on the constitutional rights of people to assemble peacefully. The public prosecutor, to the surprise of the court, sustained and strengthened the argument of the defense. He said the appeal was well taken, but in evidence for the prosecution, and practically asked the court to dismiss the case. Judge Demaree of Cincinnati granted a temporary injunction to the McDonald Printing company to restrain their striking pressmen and proofreaders. He refused, however, to grant the blanket injunction

New Laces—New Neckwear—New Embroideries

 Boys' good Straw Hats, over 800 at half price.

WOMEN'S WOES.

The woes of womankind are many; few are they who do not suffer from many aches and pains. A woman's kidneys are greatly overtaxed; household duties and other cares constantly put a strain on the kidneys. When the kidneys are overworked they rebel; they cry out through the back, and most backache pains are kidney pains.

DOAN'S KIDNEY PILLS cure every form of Kidney ills; cure a bad back, whether lame, weak or aching, cure Diabetes, Urinary troubles down to the borderland of Bright's disease.

HOUSTON PROOF:

Mrs. L. L. Hubers, residing at 912 Semmes street, Houston, says: "In September, 1901, I was taken down with typhoid fever which left me with what the doctors claimed paralysis of the bowels and kidneys. The suffering was something awful. I was troubled with bloating, swelling of my limbs and feet, pains in my back and stomach and went about the house in living misery all the time both night and day. I was often so bad I could not attend to my house work, and added to the backache there was trouble from the kidney secretions, both annoying and distressing. In place of improving as time went on I was gradually growing worse. I was getting about discouraged, as I had spent so much money for doctors and medicines of different kinds and had received very little benefit. Finally I read about Doan's Kidney Pills and feeling as poorly as I was I managed to go up to A. E. Kiehl's drug store, 302 Main street, and get a box. They were right to the very root of the disease. I felt their good effects after taking the third dose, and it was but a few days before they had relieved me of the pain in my back and had corrected the kidney secretions. It did not take the whole box to do the work. I have some of them yet and intend to keep them in the house all the time in case there should be a recurrence. I have recommended Doan's Kidney Pills to others, and will continue to do so."
